

Personnel qualification

The competence of welders is of vital importance for customers in the steel and pressure vessel, railway and defence sectors. Specialist welding companies can document and communicate the know-how of their personnel with a recognised TÜV NORD certificate - an important factor when winning high-level orders.

The notified bodies within the TÜV NORD Group undertake welding-related qualification based on all the current standards and regulations. For example, the suitability of welding and testing personnel and personnel responsible for quality management and quality assurance systems can be clearly demonstrated.

TÜV NORD also has the necessary recognitions for special welding and procedure qualification (for example for reinforcing steel according to EN ISO 17660 or fairground rides and temporary structures according to DIN 4112). With the welder ID card, which is the size of a cheque card, employees can always verify their qualification, especially when working on construction sites.

The TÜV NORD „Welding Qualification“ customer portal offers worldwide access to all necessary documents. We also regularly hold seminars, training courses and further training events and offer further welding services based on more than 100 years of experience.

TÜV NORD - Making our world safer.

Our services

- Support with all welding tasks
- Support by International Welding Engineers/Inspectors (IWE/IWI), additionally qualified according to EN ISO 9712
- Information regarding current standards and regulations and also legal questions
- Issue of welder identity cards as documented proof of legally-compliant personnel training
- Manufacturer qualification, welding procedure and personnel qualification from one source

The benefit to you:

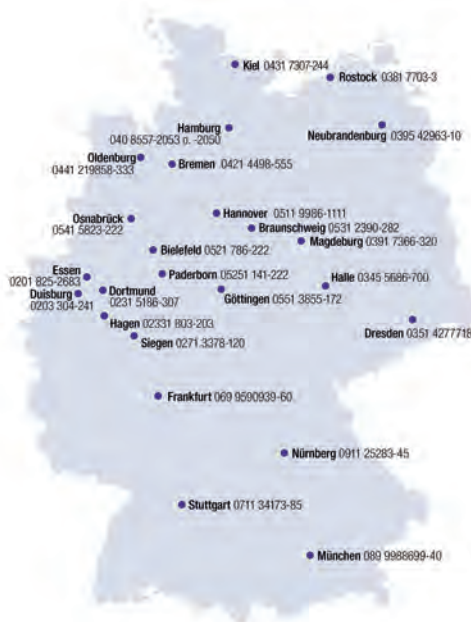

- Verifiable competence of your staff
- Internationally-recognised TÜV NORD certificates and welder ID cards
- Comprehensive one-stop project support
- Further training events for your employees
- Flexible access to all necessary documents in the TÜV NORD “Welding Qualification” portal

Our expertise:

- Recognised as a notified body for certified qualification of welding personnel
- Many years of experience in national and international projects
- Accreditation as a neutral inspection organisation
- Up-to-date knowledge of national and international standards and regulations
- Fast reaction time
- Strong regional presence

We look forward to sharing our expertise with you.
