

# Manufacturer Certification for railway vehicles DIN EN 15085-2

As a recognised manufacturer certification body, TÜV NORD offers certification based on DIN EN 15085-2 to all manufacturers of railway vehicles and components.

Based on the application of European Standard DIN EN 15085, proof of manufacturer certification is an essential step when gaining access to the international market. This testifies to the strict safety requirements within the railway sector.

Manufacturer certification is based on a factory inspection (audit), in which fulfilment of the requirements regarding processes and personnel has to be verified. Through certification of your operations according to DIN EN 15085-2, you prove that you fulfil the recognised rules of technology for railway vehicle construction.

We support you in all the necessary steps within the certification process. With our broad regional and international presence, we provide our services wherever you are.

**TÜV NORD - Making our world safer.**

# Manufacturer Certification for railway vehicles

## DIN EN 15085-2

## Our services

- Certification of facilities used for welding of railway vehicles and components according to DIN EN 15085-2
- Certification of facilities which do not perform welding, but which
  - design,
  - purchase and assemble or
  - purchase and tradewelded components and subassemblies.
- Certification of workshops which service and maintain railway vehicles according to DIN 27201-6 (in addition to the DIN EN 15085 series of standards)
- Verification of ability to perform welding work on tank wagon vessels in accordance with RID, in association with DIN EN 14025

### Further services

- Qualification test of welders according to DIN EN ISO 9606
- Qualification test of welding operators according to DIN EN ISO 14732
- Pre-production welding test according to DIN EN ISO 15613
- Welding procedure tests according to DIN EN ISO 15614
- Destructive and non-destructive material testing

### The benefit to you:

- Access to the international market
- Ability to compete in the railway vehicle construction sector
- You have a partner for all welding-related tasks

### Our expertise:

- Independence and neutrality
- Long experience in the qualification and certification of welding facilities
- Qualified staff wherever you are
- Worldwide network of competent partners
- DAkkS accredited body
- ECWRV recognised body
- Active in the work of the ECWRV (European Committee for Welding of Railway Vehicles)

We look forward to sharing our expertise with you.
