

Greater confidence for customers and partners

TÜV NORD CERT – Auditing to BSCI and Certification to SA8000

Nowadays, the subject of Corporate Social Responsibility is attracting increasing attention in the media and in society as a whole: within the framework of risk management and corporate ethics, and in particular against the background of worldwide outsourcing, companies must ensure that their suppliers behave responsibly towards both people and the environment.

This is where TÜV NORD CERT helps by providing certification according to Social Accountability (SA)8000 or an audit according to BSCI (Business Social Compliance Initiative). Based on international conventions, demonstrable observance of these standards creates confidence on the part of consumers and investors, strengthens customer and workforce loyalty, testifies to the ethics of the company and offers advantages when responding to invitations to tender.

Target groups for certification

The certifications are directed towards companies who wish to strengthen responsibility with regard to corporate behaviour – both internally and in the supply chain.

In this context, BSCI acts as a code of conduct, laid down by leading companies and the FTA (Foreign Trade Association), in order to achieve a unified social standard.

SA8000 is an internationally-recognised standard which offers certification regarding employee rights. It augments the criteria of BSCI with the requirement for a management system comparable to that based on the well-known standard ISO 9001.

Benefits of certification

Certification demonstrates that the company in question is committed to offering fair working conditions. This demonstrates responsible corporate behaviour, enhances corporate image, supports risk management and improves the prospects of market success.

In the case of BSCI, the audit is a prerequisite for becoming a business partner of BSCI member companies. In addition, an audit according to BSCI also creates a good starting point for later certification according to SA8000. SA8000 can be combined with other management systems such as ISO 9001, ISO 14001 or OHSAS 18001.

Preconditions for certification

With the goal of improving working conditions worldwide, BSCI and SA8000 require strict observance of the Conventions of the International Labour Organisation, the Declaration of Human Rights, the Convention on the Rights of the Child and Conventions on Elimination of Discrimination. They are therefore concerned with matters such as child and forced labour, occupational health and safety, freedom to establish employee representation in organisations, discrimination, working hours, living wages and work conditions. SA8000 also specifies a unified social management system, with documentation and communication, as well as demanding that responsibility be taken for the entire value-added chain, including suppliers and homeworkers.

Our know-how for your success

TÜV NORD CERT is a well-established and reliable partner for inspection and certification services throughout the world. Our experts and auditors have extensive knowledge based on experience and are in general permanently employed by TÜV NORD. This guarantees independence and neutrality and also means that we can offer continuity in supporting our clients. The benefit to you is clear: our auditors accompany and support the development of your company and provide you with objective feedback.

Are you interested?

Please send us your response by fax.

We are looking forward to hearing from you.
