# know no boundaries

## National and international registration services

If you import or export vehicles, you will know that the network of national and international rules and regulations is steadily growing denser, more confusing and more complex. Our experts can show you the way through the jungle of red tape.

We can inform and advise you about necessary vehicle modifications and how to register them in various countries. If necessary, we can also carry out a preliminary test of your vehicle's eligibility for registration. We also have an extensive vehicle database containing technical data for more than 20,000 different imported vehicles.

- Vehicle registration service
- Database of imported vehicles
- Data sheet service
- Homologation certificates
- And much more

# We provide a global service

## Registrations in Germany and Europe

- All necessary inspections carried out
- All relevant registration data provided for vehicles from the EU and beyond
- German vehicle documents and/or one-day registrations and necessary exceptional permits applied for by FS FAHRZEUGSERVICE GMBH & CO. KG
- COC papers acquired
- Data sheet service for imported vehicles  
Online form available at [www.tuev-nord.de/simex](http://www.tuev-nord.de/simex)  
Contact: [datenanfrage@tuev-nord.de](mailto:datenanfrage@tuev-nord.de)
- Homologation certificates for exports  
Contact: [homologation@tuev-nord.de](mailto:homologation@tuev-nord.de)

## Extensive vehicle database for imported vehicles, e.g.:

- Emissions
- Noise levels
- Headlight admissibility
- Braking systems
- Electromagnetic compatibility (EMC)

Our certified laboratories test exclusively in line with the applicable EC Directives.
