

# Confidence is a valuable commodity

## More safety through individual, sample and type tests

Safety and confidence are imperative factors in the fiercely competitive commercial vehicle sector. TÜV NORD delivers precisely this to you in all areas. Our field of expertise ranges from trucks-and their trailers, for cars (small production runs, eg. vehicles with a special purpose) and buses, to agricultural and forestry vehicles. Our specialist teams are at your disposal for work-machines, motorbikes, quad bikes and motorized lifts.

Make the most of our comprehensive knowledge to ensure security of your transported goods, as well as certifying the integrity of your vehicle superstructures. In this way you will maintain your good reputation, remain informed and knowledgeable about legislative and safety requirements in every situation and arrive safely at your destination.

- Test reports
- Clarification of the suitability for licensing
- COP series monitoring
- Homologation management
- Load securing
- EU type approval
- Stage approval

TÜV®

**TÜV NORD**  
Mobilität

# Safety. Benefits.

- Providing expert assessments on vehicles, trailers and their vehicle subsystems according to national and international regulations
- Checks in accordance with EU framework directives, the EU multi-stage approval for body manufacturers, the EU small production run approval, and for vehicles with a special purpose
- Preparing expert assessments and test reports to award an EU type approval or a national type approval (ABE)
- Evaluating vehicle conversions and preparing expert assessments as a basis for individual approvals
- CoP series monitoring (Conformity of Production and documentation)
- Advice and clarification on suitability for licensing of new developments such as assistance systems
- Assistance with manufacturer's documentation
- Assistance with carrying out approval procedures (homologation management)
- Verification and certification of the quality management systems pursuant to DIN EN ISO 9001
- Free market services and development support work
- Cooperation within EU and federal bodies for the development of technical standards as well as VDA and VDI

## Test sites and test tracks in Germany and Europe

- VW test site in Ehra-Lessien
- Wabco test track in Jevern
- Conti test track in Jevern
- ATP test site in Papenburg
- ADAC driving safety centre in Hanover
- Metropark Hansalinie test site in Großenkneten
- Test site in Lelystad (NL)
- IDIADA test site (E)

## Load securing

- Static and dynamic tests on vehicle superstructures in accordance with DIN EN 12642
- Testing tarpaulins in accordance with DIN EN 12641-2 and lashing points in accordance with DIN EN 12640
- Determining coefficients of friction in accordance with VDI directive 2700 Sheet 14 or DIN EN 12195-1
