

IFM - Institute for Vehicle Technology and Mobility

Symposium

Homologation and Technology for
non-road mobile machinery

Tuesday, 16.09.2025
10:00 AM – 3:30 PM CET
Online via Microsoft Teams

Online Symposium:

The newly introduced Regulation (EU) 2025/14 on the approval and market surveillance of non-road mobile machinery enables manufacturers to obtain EU type approvals for self-propelled working machines and thus to sell the vehicles across the EU without the need for additional testing.

As a leading technical service, TÜV NORD supports you in understanding and implementing the regulation. Our symposium will provide expert insights into the legislation and its practical implications.

Key Topics of the Symposium

The Homologation and Technology symposium will address the challenges of implementation and the obligations of the approval holders. Furthermore, we will give you a view on future technologies and regulations.

The Symposium is intended for:

Technical departments for type approval, authorities and vehicle development teams for “non-road mobile machinery”.

Save the Date:

Date: Tuesday, 16.09.2025
Time: 10:00 AM – 3:30 PM CET
Location: Online via Microsoft Teams

The symposium will be held in English.

Program:

Welcome & Opening

- Introduction and presentation of the IFM Whole Vehicle Type Approval department.

EU-type approval process

- General information's on the background and necessary procedures for obtaining and handling of EU-type approvals.

NRMM Regulation (EU) 2025/14

- Detailed analysis of the new Mother Regulation (EU) 2025/14 for “non-road mobile machinery”.

Lunch Break

Initial assessment

- Requirements of the approval authorities for vehicle manufacturers with regard to quality assurance measures.

Industry Insight - Guest Speaker

- A manufacturer's perspective on implementing and handling the NRMM regulation in practice

Study of NRMM for Delegated Regulations

- Current discussions regarding the technical requirements of “non-road mobile machinery”.

Summary & Open discussion
