

TÜV NORD CERT – your reliable partner for approval of pressure equipment for export to the Eurasian Economic Union (Russia, Belarus, Kazakhstan, Armenia, Kyrgyzstan)

With the entry into force of Technical Regulation TR ZU 032/2013 on the safety of equipment operating under pressure, Eurasian Economic Union (EAEU) legislation has been brought into line with the pressure equipment requirements of the current European standards and regulations.

For the first time, categorisation of the vessels (Categories I, II, III, IV) and grouping of operating media (Groups 1, 2) are included under the Regulation.

EurAsian Conformity Mark for access to Customs Union market

Even after this change, however, approvals issued for Europe will not be directly recognised by the countries of the EAEU. Nevertheless, individual evidences, such as results of non-destructive tests, material certificates, evidences of suitability and also specialist welding company certificates – as are necessary for approval in the EU – can also be used for approval on the EAEU market. This means that the new Technical Regulation makes the process easier for European manufacturers and exporters, although some requirements continue to be country-specific.

There are two ways of verifying conformity: Certification or Declaration. Following successful completion of the approval process, pressure vessels are provided with a mark confirming access to the EAEU. TÜV NORD CERT informs companies which documents are necessary and provides support throughout the approval process.

Target groups for certification

Companies from Germany and other European countries who export pressure equipment to the Eurasian Economic Union.

Benefits of certification

The official approval process can involve considerable time and expense. But using the services of TÜV NORD CERT experts helps to avoid the costs that can arise from submission of incomplete documentation and the need for additional communication with the relevant official bodies. We give detailed and comprehensive advice on the current requirements and support you all the way.

Our know-how for your success

TÜV NORD CERT is a well-established and reliable partner for inspection and certification services throughout the world. Our experts and auditors have extensive knowledge based on experience and are in general permanently employed by TÜV NORD. This guarantees independence and neutrality and also means that we can offer continuity in supporting our clients. The benefit to you is clear: our experts accompany and support the development of your products and provide you with objective feedback.

Are you interested?

Please send us your response by e-mail.

We are looking forward to hearing from you.

Yes, I am interested in approval of pressure equipment for export to the Eurasian Economic Union. Please contact me.

I would like to be informed about current issues in the future via newsletter.
