

Deutsche Akkreditierungsstelle

Annex to the Accreditation Certificate D-PL-11074-05-00 according to DIN EN ISO/IEC 17025:2018

Valid from: 01.08.2022

Date of issue: 01.08.2022

Holder of Accreditation Certification:

TÜV NORD Systems GmbH & Co. KG
Prüfstelle für Kälte-, Klima- und Lüftungstechnik
Am TÜV 1, 45307 Essen

The testing laboratory meets the minimal requirements of DIN EN ISO/IEC 17025:2018 and, if applicable, additional legal and normative requirements, including those in relevant sectoral schemes, in order to carry out the conformity assessment activities listed below.

The management system requirements of DIN EN ISO/IEC 17025 are written in the language relevant to the operations of testing laboratories and confirm generally with the principles of DIN EN ISO 9001.

Mechanical-technological tests of air handling units and their components, of comfort air conditioning units, precision air conditioning units, chillers, heat pumps, heat exchangers, heat recovery systems, air distribution systems, air duct elements, hygiene air conditioning units and their components

The testing laboratory is permitted, without being required to inform and obtain prior approval from DAkkS, to use standards or equivalent testing methods listed here with different issue dates. The testing laboratory maintains a current list of all testing methods within the flexible scope of accreditation.

This certificate annex is only valid together with the written accreditation certificate and reflects the status as indicated by the date of issue. The current status of any given scope of accreditation can be found in the directory of accredited bodies maintained by Deutsche Akkreditierungsstelle GmbH at <https://www.dakks.de>.

Annex to the Accreditation Certificate D-PL-11074-05-00

DIN EN 308 1997-06	Heat exchangers - Test procedures for establishing performance of air to air and flue gases heat recovery devices <i>(except section 5.4)</i>
DIN EN 1216 2003-04	Heat exchangers - Forced circulation air-cooling and air-heating coils - Test procedure for establishing the performance <i>(includes amendment A1:2002)</i>
DIN EN 1507 2006-07	Ventilation for buildings - Sheet metal air ducts with rectangular section - Requirements for strength and leakage <i>(except section 5.3)</i>
DIN EN 1751 2014-06	Ventilation for buildings - Air terminal devices - Aerodynamic testing of damper and valves
DIN EN 1886 2009-07	Ventilation for buildings - Air handling units - Mechanical performance <i>(except section 9 and 10)</i>
DIN EN 12237 2003-07	Ventilation for buildings - Ductwork - Strength and leakage of circular sheet metal ducts
DIN EN 13053 2012-02	Ventilation for buildings - Air handling units - Rating and performance for units, components and sections <i>(except section 5.3 and 7)</i>
DIN EN 13180 2002-03	Ventilation for buildings - Ductwork - Dimensions and mechanical requirements for flexible ducts <i>(except section 5.2 - 5.7)</i>
DIN EN 14511-3 2019-07	Air conditioners, liquid chilling packages and heat pumps for space heating and cooling and process chillers, with electrically driven compressors - Part 3: Test methods
DIN EN 14511-4 2019-07	Air conditioners, liquid chilling packages and heat pumps for space heating and cooling and process chillers, with electrically driven compressors - Part 4: Requirements <i>(only section 4.7)</i>
DIN EN 14825 2019-07	Air conditioners, liquid chilling packages and heat pumps, with electrically driven compressors, for space heating and cooling - Testing and rating at part load conditions and calculation of seasonal performance
